Dynamik TOAN WILLY MACHETINE

fixed to a charge just before firing to set it off. Set fire in open hir dynamile burus flercely with a smoky flame, but does not explode unless several sticks are closely piled together or packed in a box. The most common cause of premature explosion of dynamite is separation of its nitroglyceria. alight friction or shock causing this to explode and, in turn, explode the dy-namite. Separation of nitroglyceria usually occurs when frozen dynamite is being thawed out; hence so many cases of explosion by careless or igno-rant persons who use a perfectly good stove in a course of instruction in how to handle dynamite. The force of a dynamite explosion is usually greatest downward. Thus a stick of dynamite exploded on a rock without being covered will shatter the rock, but will pro duce little effect in other directions. Like all explosives, dynamite must be inclosed to produce its maximum effects. Dynamite is sometimes prepar-ed in granular form for producing certain explosive effects, but its action is too rapid and intense for use in rifles or cunnon.-American Druggist.

Great Place For Hunting. The fauna of Uganda is probably anequaled in variety and importance in any other country in the world. On the lakes are found a great number of water birds, storks, cranes, herons, flamingoes, geese, ducks and divers. But the finest are perhaps the huge eagles, which prey on the fish, of which there is a great variety. Hippopotamuses and crocodiles haunt all the waters in the country. On land elephants are found in Buganda, Bunyoro, Buddu. Toro, Busogn, Elgon and the Nile districts; buffaloes are found near the swamps; wild boars, byenss. leopards and wildcats infest the woods, where smaller creatures, such as squirrels, gray parrots, monkeys and guines fowl, are found. In the wild and more open country to the north there are rhinoceroses, zebras, os-triches and many varieties of antelope. and throughout the country vultures and kites abound.

A Giant Sun.

Canopus, the giant of the stellar system, is, according to a recent calculation of W. F. A. Ellison, 49,000 times as bright as the sun. It is 134 times as large as the sun in diameter, 18,000 times in surface and 2,420,000 times in volume. Its distance from us, according to the same estimate, is 489 light years. Suppose, says Mr. Elilson, that instead of being at this enormous distance it were placed in the center of the solar system in lieu of the sun. It would then occupy eighty-five hundredths of the space lying within the orbit of Venus and, as seen from the earth, would subtend an angle of about seventy degrees of arc. Thus, when its lower timb was on our horizon, its upper would be within twenty degrees of the zenith. Needless to say no life could exist on earth with such a neighbor. - Scientific

The Fame of Lene.

Lens leaped into fame in the seventeenth century. During the Thirty var between France and Spain Louis II. of Bourbon, known as the Great Conde, achieved one of his most notable victories when, on Aug. 20, 1648, he defeated the Archduke Leopold. On that occasion the celebrated Spanish infantry was completely beaten. Conde was at that time commander in chief of the French forces, and Turenne was his subordinate. The battle began with a panic in Conde's own regiment, but was re trieved by his own coolness and bravery. In after years he fought for the Spanish against his own country, where, however, he ended his days in peace, enjoying the society of Mollere and other great Frenchmen of letters. -London Tatler.

Perplexing Plurals.

Little Eisle had just reached the grade in school where the study of grammar is a part of the day's work. Among other things she was greatly interested in the singular and plural form of words. She knitted her little brow and looked puzzled when she asked her mother:

"Is the plural of bird burden?" "Why, dear, how could you think

that?" the mother answered. "Well," explained the child, "father said Willie Blank was a bird, and I heard you say that he and his brothers and sisters were such a burden to their mother,"-Exchange.

Toil's Victim.

Interested Friend - 1: Willie doing veil at college this year? Fond Mothr-Oh, very! I know he must be studying dreadfully hard because only the other day the president told him he must either change his ways or go somewhere else for his health.-Richmond Times-Dispatch.

It Was Both.

"What do you think of old Uncle Peter devising all his money for the erection of a mausoleum over his remains?" said the first needy relative. "Awful!" replied the second. "It's

just a willful waste." "Huh! I call it a wasteful will."

Kindred Spirits. "You and Grump seem to get along

pretty well." "Yes. You see, he never borrows anything but trouble, and that's all I ever had to lend."—Boston Transcript.

Genius finds its own road and carries

It is almost as bad as Gilbert's neg-lected name, which was Schwenck. But perhaps that was too near "swank" for a modest man. Ruther-ford Crockett would have served the author of "The Stickit Minister" well, but he was content with S. R. Sir Arthur Pinero's second name is Wing. Bilas Hocking's is Kitto, Jerome K. Jerome's is Klapka, and Gilbert Ches-terton's "K" stands for Keith. Charles Dickens was christened Charles John Huffham.

It is a remarkable fact that nearly all the greater novelists are simply styled—Henry Fielding, Jane Austen, Waiter Scott. Charles Reade, George Meredith, Thomas Hardy. William Makepeace Thackeray ignored his sec-and name.—St. James' Gazette.

What Becomes of That Cent?

A farmer comes to town with thirty apples, which he sells three for a cent, getting, of course, 10 cents for them. Another farmer, also with thirty apples, sells them two for a cent, getting 15 cents for his. They get 25 cents

The next time they come in, with thirty apples apiece, they meet at the edge of town and put their apples together, making sixty apples. One man having sold two for a cent, the other three for a cent, they decide to sell them five for 2 cents.

They do so and when they're through find out they have received but 24

The problem is, Why did they not get as much for their apples selling them five for 2 cents as they did when they sold them separately, or, what be-comes of the cent?-Columbus Dis-

Fire and the Lodgepole Pine. Fire, the arch enemy of the forest is the very life of the lodgepole pine, for cessation of fires would in time practically eliminate the species from the forest. Following a sweeping fire it is found that the lodgepole pine is the first tree at work to make good its loss. On the blackened limbs of

the fire killed tree are scores of cones stuck closely to the branches. Within these cones lie fertile seeds waiting for nature to set them free. The flery whiriwind sweeps by, and in a few hours the brown bits of tissuelike seeds silently climb out of their sheltering homes and make a flight to the earth. Being exceedingly light, thousands are sometimes blown for miles. An earth cleaned for their reception is found by the germs of new

woods life.

"Ough." An exchange prints the following tist of words ending in "ough" and adds the pronunciation of the more obscure words, so far as ascertainable from the dictionaries: Mesers. Gough (goff), Hough (huff) and Clough (cluff), though tough enough, thought through the day that they would visit Mr. Brough (broo), who, having a blecough iciuff or clou), with plenty of dough and a tame chough (chuff) kept near a plough in a rough trough, hung to a bough over a lough (loch). A slouch (sluf) of the bank into the slough (sloo) injured his thoroughbred's hough

bock) No wonder the foreigner shudders at those four terrible letters!

Strong Even in Death.

yew tree almost destitute of branches or bark grows abundantly in the Caucasus to a height of from fifty to sixty feet and a diameter of a little over two feet. It grows slowly, but its timber is almost indestructible except by fire. It is considered superior in durability, appearance and toughness to mahogany, which it otherwise somewhat resembles. In some large forests of this tree it is very difficult to distinguish the live trees from the dead ones, the latter being very numer ous and said to stand for 100 years after death without exhibiting decay.

Base Deception. Family Physician-I am afraid, Mrs Gaybird, your husband cannot last much longer. The trouble with your husband, madam, is that he has overdrawn his account at the bank of vitality. Mrs. Gaybird-I felt sure he was deceiving me about something Doctor, I give you my word, I never knew he had any account there.-Topeka Journal.

John Hay on Stanton. In "The Life and Letters of John

Hay" is this plaintive note to Nicolay: "My dear Nico-Don't, in a sudden spasm of good nature, send any more people with letters to me requesting favors from Stanton. I would rather make the tour of a smallpox hospital."

The Obliging Proprietor.

"Won't you please give me an or-der?" pleaded the persistent drummer. "Certainly," replied the crusty pro-prietor. "Get out!"

Smith-You and Jones don't seem to

te as friendly as you were. Does be we you money? Brown-No. not ex ectly, but he wanted to.

Gooseberry bushes were originally called gorseberry bushes, from the plants having prickles similar to those of the gorse shrub.

the structure Line there are not not the property of the second to be store

others who don't. When W. W. Jatouts was commencing his literary career and haping to "make a name" that he is a physician Even the prewhy did he not make the best of the
one he got at the font? What a spinsh
be could have made with William Wymark Jacobs:

It is almost as had as Gilbert a new. hands us in bottle or box. We hall a passing cab to take us to our destination in the middle of the night, feeling no alarm lest the driver be in league with a gang of footpads. We send our cash deposit to the bank by the hand of a messenger concerning whose virtues we have no guaranty beyond the fact that thus far we have not found him light fingered. We add our names to this and that petition on the say so of some one who may or may not, for all we are aware, have an ulterior and illegitimate interest in swelling his list, and we sign letters and other documents which we have only hurriedly skimmed over in their final draft and in which our tired copyist may have embaimed an error fatal to our purpose.-Atlantic.

Differently Expressed.

The same idea may be expressed in many different ways, according as the speaker's mode of thought is influenced by his surroundings.

Take, for example, a well known adage and notice how the residents of everal cities would put it:

"A bird in the hand is worth two in the bush.

In Boston this might become: "One thought of Browning, thorough ly assimilated, is more valuable than two in a state of mental nebulosity." The New York version;

"Paper profits must be realized upor before they can add to one's bank ac

Translated into Chicagoese: "One hog in the packing room and ready for market is better than two on the hoof at the point of production."

Now go as far west as Denver: "It is the cashed chips that count."-

Persian Agriculture.

The great arid wastes of Persia would lead one to believe that the country does not produce sufficient grain to supply the needs of its popu lation. Such, however, is not the case and considerable quantities of grain are exported each year. The principal grains grown are wheat, barley and rice. Corn is planted in small quantities, but is used only for rousting ears. Onts and rye are seldom sown. Ex-cept along the Caspian coast, Persian agriculture is dependent almost entire y on irrigation. The agricultural implements used in Persia are of the most primitive kind. Plows are made from forks of small trees, with the addition of an iron share. It is stated to be doubt ful, however, whether the yield of grain would be greatly increased by using modern plows, as there is no sod and this crude implement seems to stir the soil fairly well.

Wonders of the World. Three groups of "wonders," each containing seven, are listed as seven wonders of the ancient world, seven wonders of the middle ages and seven wonders of the modern world. The first group comprises pyramids of Egypt, phares of Egypt, hanging gardens of Babylon, temple of Diana at Ephesus, statue of Jupiter by Phidias, mausoleum of Artemisia, colossus of Rhodes. The second group comprises the colliseum of Rome, catacombs of Alexandria, Great wall of China. Stonehenge, leaning tower of Pisa, porcelain tower of Nanking, mosque of St. Sophia. The modern group comprises wireless, telephone, aeropiane, radium antiseptics and antitoxins, spectrum analysis, X ray.

Napoleon's "Nine Lives." The surrender of Napoleon to the captain of the Bellerophon, when that event became known in England, was discredited by many, for at least eight times previously he had been reported dead, says the Westminster Gazette. The list of his deaths published in a contemporary journal is interesting. He lost the first of his nine lives in a buttle on the Dnieper, where he re ceived "five mortal wounds and ex pired as he gave his sword to Prince Kutusoff." Later he was twice drowned, once "while crossing the Mosqua" and again in Moscow, "where he lost his way and fell into a reservoir." During the retreat from Moscow he was suffocated in his tent and a few days later buried 5,000 fathoms deep in a fall of snow. Finally he reached Paris, where his exasperated subjects lumediately lynched him. These were some of the many fables concerning Napoleon which found their way into the newspapers a century

The name of Assinibola was formerly at different times applied to two districts in Canada, but now belongs properly to none. The first was the district formed in 1835 by the Hudson's Bay company, having in it Fort Gary, at the junction of the Red and Assintboine , rivers, in Rupert's Land. It censed to exist when Rupert's Land nite existence by an act of the Dominfrom the western boundary of Mani- 23, limited to return Jan. 18, 1916. toba to the line of 111 degrees west and from the parallel of 49 degrees north to 52 degrees north. Saskatche- ited to retur wan lay to the north of the district, to Arkansas, and in 1905 the two were united, with slightly different boundaries, under the raine of Sasknichewan,
